

THE LATEST DEVELOPMENTS 2022 - Q3

BUSINESS AS USUAL AS TRADE SHOWS RETURN.

31 BIEMH

The advanced industry is brought together again at the BIEMH 2022 fair.

More than 35,000 visitors from 52 countries attended the most awaited fair of the sector in Spain. The fair attracted more than 1,400 exhibiting companies from 28 countries, more than 3,400 machines, products, services and innovations.

BIEMH-Bienal has celebrated its 31st edition at a key moment to take the pulse of the sector and SCS was present at its stand located in Hall 2. We attended hundreds of visitors and advised on developments in high-pressure cooling systems.

SCS presented the new SCD product line: products for coolant distribution, improvement of safety and productivity in machine tools; a solution for all machine manufacturers who want to improve production for their customers.

We showcased our new SCD product line: products for the improvement of safety, efficiency, and final product quality.

Being back in the trade-fairs this year has been a great way of connecting with new customers and creating some more brand equity!

There were over 35,000 visitors at this year's BIEMH 31 trade-fair.

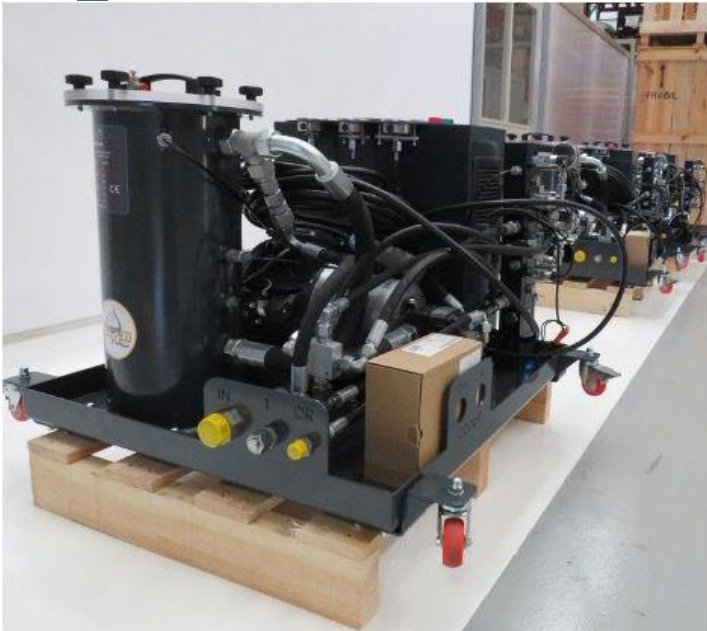

Our booth in Hall 2 was visited by hundreds of visitors, whom we advised on developments in high pressure cooling systems.

berotec

Our client BEROTEC uses several SCS-HP products at its Moutier site. This Swiss company manufactures customised high-precision parts according to its customers' needs.

They have a large technological park for different machining applications that facilitates production from small to large series.

"Berotec has a large technological park for different machining applications."

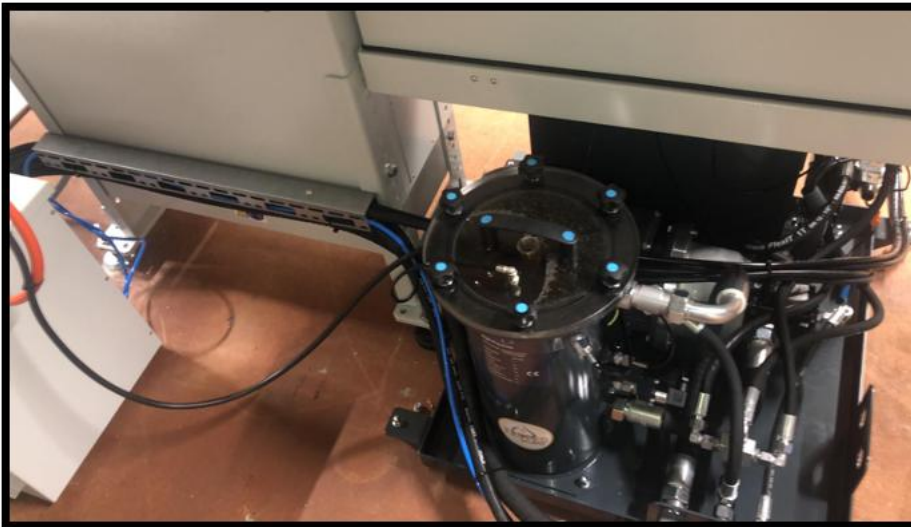

REALTOOLS

Our partner, Realtools SA, is a store of precision tools and accessories for industry located in Moutier, Switzerland.

Realtors are professionals in the sector who market highly innovative and high-quality products for the metalworking industry.

They are currently one of our distributors in Moutier and have sold 7 units of SCS-200 in the past 9 months.

SCS-200 OIL 135Bar 24L/min.

We plan to continue bringing new products to the marketplace that can add value and make machining more productive, efficient, and safe.

With the return of trade shows and exhibitions, we are able to place ourselves in front of an ever-increasing audience of customers and distributors, allowing us to grow our company worldwide.

We'd like to hear about your feedback and experiences and remain absolutely open to any suggestions that you may have, or any products that you feel could bring value to customers and have a good acceptance in the market.

Thank you!
